Can anyone recommend that is just as solid?

 **Roger S** 

If I were you, I'd consider the banking sector. I'm personally in a long position for CitiGroup.

Stocks, ETFs, Forex and Digital Options

IQ Option is one of the fastest growing online trading brands in the world! Voted the best mobile trading platform, we have now expanded our offerings to include stock trading, ETF trading, Forex trading and a brand-new product unique to IQ called Digital Options.

First founded in 2013, IQ Option has grown massively, and now has over 25 million members and counting! The platform itself has also undergone some changes since 2013, and we are constantly working to ensure it is fast, accurate and easy to use.

We have also refined our offering and introduced plenty of new products in our bid to continue giving our customers the ultimate online trading experience, and to help them optimize their investment portfolio.

Now, using our platform, our members can try online stock trading, forex currency trading, Exchange Traded Funds (ETFs), and Digital Options.

ular choice for investors. Forex, or FX
uid market in the world, with daily trades
turning into millions of dollars. Currencies are traded in pairs, with the USD

and the EUR being the most common traded currency and counter currency. Currency trading carries a level of risk but can also turn a huge profit for successful traders

[Learn More](#)

Options

As well as all these great products, you can also trade on over 10 million Digital Options, where you speculate on the global market movements of commodities, currencies, indices and stocks. Online options trading can be a great introduction to the world of trading.

[Learn More](#)

Stocks

Stock trading is one of our newest products, and with IQ Option you can buy shares and trade on over 7485 stocks from some of the most successful companies on the NYSE and NASDAQ.

[Learn More](#)

ETFs

ETF trading is another new addition to the platform that offers an excellent way to diversify your investment portfolio with less risk. ETFs track baskets of assets, commodities and indexes, and trade in the same way as common stock on the stock exchange. They allow investors to buy on margin, sell short and purchase as little as a single share.

As a member, we provide you with numerous tools to help you better understand all the trading options on offer, as well as a blog with frequent updates so you can stay ahead of international news and financial events.

The Financial Products offered by the company include Contracts for Difference ('CFDs') and other complex financial products. Trading CFDs carries a high level of risk since leverage can work both to your advantage and disadvantage. As a result, CFDs may not be suitable for all investors because it is possible to lose all of your invested capital. You should never invest money that you cannot afford to lose. Before trading in the complex financial products offered, please ensure to understand the risks involved.
